

Pneumatic Scale Angelus

TECHNOLOGY - QUALITY - SERVICE

GENERAL CATALOGUE OF LABELLING

MACHINES AND SEALING MACHINES

PRESSURE SENSITIVE

ACCUTECH S-III
Outputs up to 60,000 bp/h

ACCUTECH S-II
Outputs up to 12,000 bp/h

ACCUTECH S-I
Outputs up to 8,000 bp/h

4 - 5

ROLL FED

ETIROLL
Outputs up to 60,000 bp/h

10

HOT-MELT GLUE

CANTECH S-III
Outputs up to 60,000 bp/h

CANTECH S-II
Outputs up to 24,000 bp/h

CANTECH S-I
Outputs up to 12,000 bp/h

6 - 7

MONOBLOC

MEP / MEPF
Outputs up to 25,000 bp/h

11

COLD GLUE

AUTOTECH S-III
Outputs up to 60,000 bp/h

AUTOTECH S-II
Outputs up to 15,000 bp/h

AUTOTECH S-I
Outputs up to 12,000 bp/h

8 - 9

TAX STRIP

PREMAT 10/10
Outputs up to 25,000 bp/h

PREMAT E-8/8
Outputs up to 10,000 bp/h

PREMAT EP-3
Outputs up to 3,000 bp/h

12 - 13

ACCUTECH S-III

Outputs up to 60,000 bp/h

Self-adhesive rotary labelling machines for cylindrical, square, oval containers, etc.
Possible types of labelling: Label, back-label, neck collar, shoulder collar, band, seals, etc.
Machines with guillotine type protection.
Mixed labelling possible.
Ultra 5000 and ControlLogix self-adhesive heads for large runs.
Fitted with programmable PLC.
Available with mechanical cam or servomotors on each bottle plate.
Several types of positioning: Mechanical (side or by the base), photoelectric, cameras, etc....

ACCUTECH S-II

Outputs up to 12,000 bp/h

Self-adhesive rotary labelling machines for cylindrical, square, oval containers, etc.
Possible types of labelling: Label, back-label, neck collar, shoulder collar, band, seals, etc.
Machines with protective cabin with folding doors. Mixed labelling possible.
BP-35 self-adhesive heads for medium runs. Equipped with micro PLC.
Available with mechanical cam or servomotors on each bottle plate.
Several types of positioning: Mechanical (side or by the base), photoelectric, cameras, etc....

ACCUTECH S-I

Outputs up to 8,000 bp/h

Self-adhesive rotating labelling machines for cylindrical, square, oval containers, etc.
Possible types of labelling: Label, back-label, neck collar, shoulder collar, band, seals, etc.
Machines with protective cabin with folding doors. Mixed labelling possible.
BV-25 self-adhesive heads for small runs. Equipped with micro PLC.
Several types of positioning: Mechanical (side), photoelectric, cameras, etc....
Ideal machine for the wine sector.

CANTECH S-III

Outputs up to 60,000 bp/h

Hot-melt rotary labelling machines for cut and stuck paper or plastic wraparound labels for cylindrical, square, oval containers, etc.
 Machines with guillotine type protection.
 Mixed labelling possible.
 Own glue tanks manufacture.
 Possible adaptation industrial gluing equipment.
 Fitted with programmable PLC.
 Available with mechanical cam or servomotors on each bottle plate.
 Several types of positioning: Mechanical (side or by the base), photoelectric, cameras, etc....

CANTECH S-II

Outputs up to 24,000 bp/h

Hot-melt rotary labelling machines for cut and stuck paper or plastic wraparound labels for cylindrical, square, oval containers, etc.
 Machines with guillotine type protection. Mixed labelling possible. Own glue tanks manufacture. Possible adaptation of spiral industrial gluing equipment.
 Fitted with programmable PLC.
 Available with mechanical cam or servomotors on each bottle plate.
 Several types of positioning: Mechanical (side or by the base), photoelectric, cameras, etc....

CANTECH S-I

Outputs up to 12,000 bp/h

Hot-melt rotary labelling machines for cut and stuck paper or plastic wraparound labels for cylindrical, square, oval containers, etc.
 Machines with protective cabin with folding doors. Own glue tanks manufacture.
 Possible adaptation of spiral industrial gluing equipment.
 Equipped with micro PLC.
 Several types of positioning: Mechanical (side or by the base), photoelectric, cameras, etc....

AUTOTECH S-III

Outputs up to 60,000 bp/h

Cold adhesive rotary labelling machines for cylindrical, square, oval containers, etc.
Possible types of labelling: Label, back-label, neck collar, shoulder collar, band, etc.
Machines with guillotine type protection.
Mixed labelling possible.
Heads mounted on fixed box.
Fitted with programmable PLC.
Available with mechanical cam or servomotors on each bottle plate.
Several types of positioning: Mechanical (side or by the base), photoelectric, cameras, etc....

AUTOTECH S-II

Outputs up to 24,000 bp/h

Cold adhesive rotary labelling machines for cylindrical, square, oval containers,
Possible types of labelling: Label, back-label, neck collar, shoulder collar, band, seals, etc. Machines with protective cabin with folding doors. Mixed labelling possible. Heads mounted on fixed box. Equipped with micro PLC.
Available with mechanical cam or servomotors on each dish.
Several types of positioning: Mechanical (side or by the base), photoelectric,

AUTOTECH S-I

Outputs up to 12,000 bp/h

Cold adhesive rotary labelling machines for cylindrical, square, oval containers, etc.
Possible types of labelling: Label, back seals, neck collar, shoulder collar, band, seals, etc.
Machines with protective cabin with folding doors. Heads mounted on fixed box. Equipped with micro PLC. Several types of positioning: Mechanical (side), photoelectric, cameras, etc....

ETIROLL

Outputs up to 60,000 bp/h

Hot-melt rotary labelling machines for roll fed wraparound labels for cylindrical, square, oval containers, etc.
 Machines with guillotine type protection.
 Fitted with programmable PLC.
 Available with mechanical cam or servomotors on each bottle plate.
 Several types of positioning: Mechanical (side or by the base), photoelectric, cameras, etc....

MEPF

Outputs up to 25,000

Cold glue adhesive or self-adhesive rotary labelling and sealing machines for cylindrical, square, oval containers, etc.
 Possible types of labelling: Label, back-label, neck collar, shoulder collar, band, etc.
 Machines with guillotine type protection.
 Mixed labelling possible.
 Fitted with programmable PLC.
 Available with mechanical cam or servomotors on each bottle plate.
 Several types of positioning: Mechanical (side or by the base), photoelectric, cameras, etc....

PREMAT 10/10

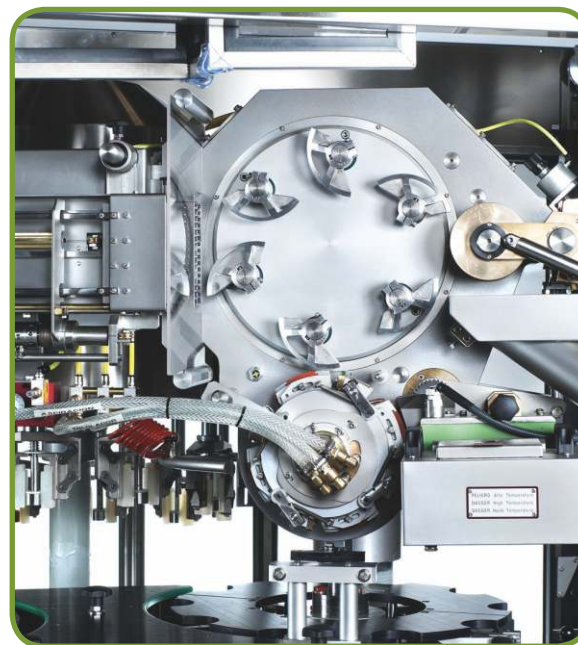

Outputs up to 25,000 bp/h

Rotary sealing machines for cylindrical, square, oval containers, etc.

Machine with protective cabin with folding doors or guillotine, depending on the model.

"U" or "L" shaped seals inverted on the bottle necks.

PREMAT 8/8

Outputs up to 10,000 bp/h

Rotary sealing machines for cylindrical, square, oval containers, etc.

Machine with protective cabin with folding doors.

"U" or "L" shaped seals inverted on the bottle necks.

PREMAT EP-3

Outputs up to 3,000 bp/h

Rotary sealing machines for cylindrical, square, oval containers, etc.

Machine with protective cabin with folding doors.

"U" or "L" shaped seals inverted on the bottle necks.
